

## AniWipe Certificate of Analysis

**Trade name:**

AniWipe®

**Type of product:**

AniWipe® Wet Wipes are intended for cleansing and soothing of animals' skin, especially with irritation. Especially suitable for cleansing skin folds, ears and between the toes. The wipes are also well suited for more sensitive skin areas, such as lip folds, the area around the eyes and intimate areas. Also suitable for cleansing wounds and abscesses and for neutralising odour. Can also be used in dressings.

**Specifications of raw materials:**

Resin solution's GC fingerprint structure as internally specified: COMPLIES  
Glycerol conforms to European Pharmacopoeia standards: COMPLIES  
Distilled water: COMPLIES

**Microbial quality of AniWipe:**

Antimicrobial efficacy as specified in Ph.Eur. 5.1.3 Challenge test (log reduction > 3):  
COMPLIES  
TAMC < 10 cfu: COMPLIES  
TYMC < 10 cfu: COMPLIES

**Composition:** Aqua, Glycerin, Propanediol, Isopentyldiol, Picea Abies Resin Extract, Phenoxyethanol, Methylpropanediol, Caprylhydroxyamid acid, Sodium hydroxide, Sodium Chloride

**Information for use:** Use the treatment wipes to cleanse the desired skin area 1-2 times per day or as needed. Do not rinse the area afterwards. Resin components can cause an allergic contact dermatitis within people that are allergic to natural resins. This reaction is usually mild in nature and heals on its own when the use of the product is discontinued. If a colophony allergic person applies the product on animals, the use of gloves is recommended. Allergic reactions are rare on animals.

**Shelf life:** 2 years unopened, 3M stability after opening
